

Earth Systems Foldable Instructions:

Follow the instructions below to complete your Earth Systems Foldable in your ISN.

1. Open up to the next available page in your ISN.
2. Label that page "Earth Systems Foldable"
3. Cut the Earth Template given to you by your teacher so that it will fit your ISN. DO NOT CUT IT TOO CLOSE TO THE EDGES OR IT WILL TEAR TOO EASILY.
4. Neatly color the Earth Template using accurate colors.
5. Once you have colored the Earth Template, CAREFULLY cut along the dotted lines (shaped like a plus sign). DO NOT CUT ALL THE WAY TO THE EDGE.
6. Glue the EDGES of the Earth Template into your ISN. MAKE SURE YOU DO NOT GLUE THE TABS DOWN! You should be able to fold back all 4 tabs to reveal the system name underneath.
7. Neatly color the Earth's Systems tab sheet (shows the Atmosphere, Biosphere, Geosphere, and Hydrosphere) using accurate colors. MAKE SURE YOU CAN READ THE WORDS AFTER YOU COLOR.
8. Once you have colored the Earth's Systems tab sheet, CAREFULLY cut the paper into 4 strips that show the each system name.
9. Arrange the 4 strips underneath the folded tabs on the Earth Template. Glue them in NEATLY so that the Earth Template can be folded down to hide each system name. MAKE SURE YOU ONLY HAVE 1 SYSTEM NAME UNDER EACH TAB.
10. Once you have glued the Earth and the names of the system into your ISN, write the definition on the back of the Earth tab for the Earth System that is shown underneath that tab. MAKE SURE IT IS NEAT!
