

Energy Vocabulary

1. Energy (p. 320) – The ability to cause change.
2. Kinetic Energy (p. 321) – The energy of motion.
3. Potential Energy (p. 322) – Stored energy of an object due to its position, condition, or chemical composition
4. Mechanical Energy (p. 324) – the sum (+) of the kinetic energy and potential energy due to its position.
5. Law of Conservation of Energy (p. 325) - states that energy can neither be created nor destroyed, it can only be transformed.
